

# SPECIFICATION

## Magnesium Acetate Tetrahydrate for Molecular Biology

| REQUIREMENT                   | SPECIFICATION                                |
|-------------------------------|--|
| Appearance                    | White, crystals ~ crystalline powder or mass |
| Solubility in dil.acetic acid | to pass test                                 |
| Deoxyribonuclease             | to pass test                                 |
| Ribonuclease                  | to pass test                                 |
| Assay                         | min.99.0%                                    |
