

Code No.19-1336

# SPECIFICATION

## Sinapic Acid

for Proteome Research

| REQUIREMENT                              | SPECIFICATION                             |
|------------------------------------------|-------------------------------------------|
| Appearance                               | White ~ pale yellow, crystalline powder ~ |
| Solubility in methanol                   | powder                                    |
| Loss on drying over silica gel in vacuum | to pass test                              |
| Assay (HPLC)                             | max.1.0%                                  |
|                                          | min.99.5%                                 |
