

Code No.19-1001

# SPECIFICATION

## Sodium Chloride

for Pesticide Residue-PCB Analysis

| REQUIREMENT                                    | SPECIFICATION                        |
|--|--------------------------------------|
| Appearance                                     | White, crystals ~ crystalline powder |
| Solubility in water                            | to pass test                         |
| pH of a 50g/l solution at 25°C                 | 5.0~8.0                              |
| Loss on drying at 200°C                        | max.0.2%                             |
| Suitability for pesticide residue-PCB analysis | to pass test                         |
| Assay  | min.99.5%                            |
