

Code No.04-2751

SPECIFICATION

10mg/mL Deoxyribonucleic Acid Solution, from Calf Thymus (Phenol-chloroform extracted)  
for Genetic Research

| REQUIREMENT                         | SPECIFICATION       |
|-------------------------------------|---------------------|
| Appearance                          | to pass test        |
| Ratio of absorbance (E260nm/E280nm) | under investigation |
| Electrophoresis test                | to pass test        |
| Concentration                       | 8.0~15.0mg/mL       |
