

## SPECIFICATION

## o-Ethoxybenzamide

Wako Special Grade

| REQUIREMENT                         | SPECIFICATION                      |
|-------------------------------------|------------------------------------|
| Appearance                          | White, crystalline powder ~ powder |
| Melting point                       | 131~134°C                          |
| Loss on drying over silica gel      | max.1.0%                           |
| Residue after ignition (as sulfate) | max.0.1%                           |
| o-Hydroxybenzamide                  | to pass test                       |
| Assay (HPLC)                        | min.98.0%                          |
