

Code No.16-1469

## SPECIFICATION

### 0.0025N Poly(diallyldimethylammonium Chloride) Solution for Colloidal Titration

| REQUIREMENT                         | SPECIFICATION                              |
|-------------------------------------|--------------------------------------------|
| Appearance                          | Colorless ~ nearly colorless, clear liquid |
| Suitability for colloidal titration | to pass test                               |
| Factor (20°C)                       | 0.99~1.01                                  |
