Anti 6 × Histidine, Monoclonal Antibody (9F2)
抗 6 × ヒスチジン, モノクローナル抗体 (9F2)

The 6 × histidine polypeptide has been used as the tag for detection and/or purification of recombinant protein.

Monoclonal Anti 6 × histidine (6 × His) antibody was produced by hybridoma clone 9F2. This clone was established by fusing mouse myeloma cells and lymphocytes of mice immunized with synthetic 6 × His peptide that was coupled with keyhole limpet hemocyanin (KLH). This antibody was purified from mouse ascites.

This product is for laboratory use only ; use in any such application is the responsibility of the user.
