< for Research Use Only >

Code No. 077-06411 (50 μ g)

Gal3 Lectin (Full-length), recombinant, Solution
Gal3レクチン(全長), 組換え体, 溶液
(Galectin-3)

Galectins are a family of proteins which typically bind β -galactose-containing glycoconjugates and conserve the primary structural homology in their carbohydrate recognition domains (CRDs). The galectin family is classified into three groups according to their structure : the prototypical-type, chimeric-type and tandem-repeat-type.

The galectin-3 is the chimeric-type. This full-length galectin-3 includes the carbohydrate-recognition domain in the C-terminal part and the tandem repeats of short amino acid segment in the N-terminal part.

Source : *E. coli* expressed human galectin3 (full-length) (Gal3).

Appearance : PBS(–)

Protein concentration : Indicated on the label.

Carbohydrate specificity : Gal, poly LacNAc

[Expiration date] Indicated on the label.

[Storage] Store at –80 °C. Avoid the freeze-thaw cycles.

[Package] 50 μ g
