DMSO Solution (EDTA free) (× 100)****プロテアーゼ阻害剤カクテル セットⅢ・
DMSO溶液(EDTA 不含)(× 100)**

This protease inhibitor cocktail is used for extraction of lysates from mammalian cells/tissues and bacterial cells using immobilized metal ion affinity chromatography.

It is the ready-to-use cocktail contains six protease inhibitors in DMSO with broad specificity for aspartic, cysteine, serine proteases and aminopeptidases.

Appearance : DMSO solution**Usage :** 1vial (1 mL) of this product is sufficient for about 20g (wet weight) tissue.

This cocktail set is supplied as 100 × stock solution. Dilute to 1 × solution with appropriate solution or sample solution before use.

※Precaution

Since not all organisms contain the same level of endogenous proteases, it may sometimes be necessary to increase the concentration of inhibitors.
