

Code No.01-2860

SPECIFICATION

Acephate Reference Material [CRM]  
for Pesticide Residue Analysis

| REQUIREMENT                              | SPECIFICATION            |
|--|--------------------------|
| Appearance                               | White, crystals ~ powder |
| Solubility in acetone                    | to pass test             |
| Melting point                            | 89~93℃                   |
| Loss on drying over silica gel in vacuum | max.0.2%                 |
| Purity                                   | min.98.0%                |
| Assay (capillary GC)                     | min.98.0%                |
