

Code No.05-0073

## SPECIFICATION

## Ethyl Cellulose (abt.49% ethoxy) 45

| REQUIREMENT                                                                     | SPECIFICATION                     |
|---------------------------------------------------------------------------------|-----------------------------------|
| Appearance                                                                      | White ~ slightly yellow, granules |
| Viscosity (5%, 25°C) (after drying)                                             | 45~65mPa·s                        |
| Loss on drying at 105°C                                                         | max.2.0%                          |
| Ethoxy group (C <sub>2</sub> H <sub>5</sub> O-) (calculated on the dried basis) | 45~50%                            |
