

Code No.16-2914

## SPECIFICATION

### Potassium Hexafluorophosphate

for Functional Inorganic Materials

| REQUIREMENT                     | SPECIFICATION                                |
|---------------------------------|----------------------------------------------|
| Appearance                      | White ~ slightly brown, crystalline powder ~ |
| Water                           | powder or mass                               |
| pH of a 0.4g/L solution at 25°C | under investigation                          |
| Lead (Pb)                       | 3.0~7.0                                      |
| Iron (Fe)                       | max.10ppm                                    |
| Assay                           | max.100ppm                                   |
|                                 | 95.0~105.0%                                  |
